THE ROLE OF CEREBRAL FUNCTIONAL  
NETWORK TOPOLOGY IN ALZHEIMER'S DISEASE

# In a network state of mind

*network*: a group or system of interconnected elements  
networks are *everywhere* around us and inside us  
they are much more than the sum of their parts,  
and *create new levels of meaning*:

cognition *emerges* from our interconnected neurons

a face *emerges* from the words on the front cover  
a new perspective on Alzheimer *emerges* from the words inside
